

Rotor Mobility wanted to help customers with hassle-free motor bike trading. Our mobile application enabled buyers to make purchases within a blink of an eye.

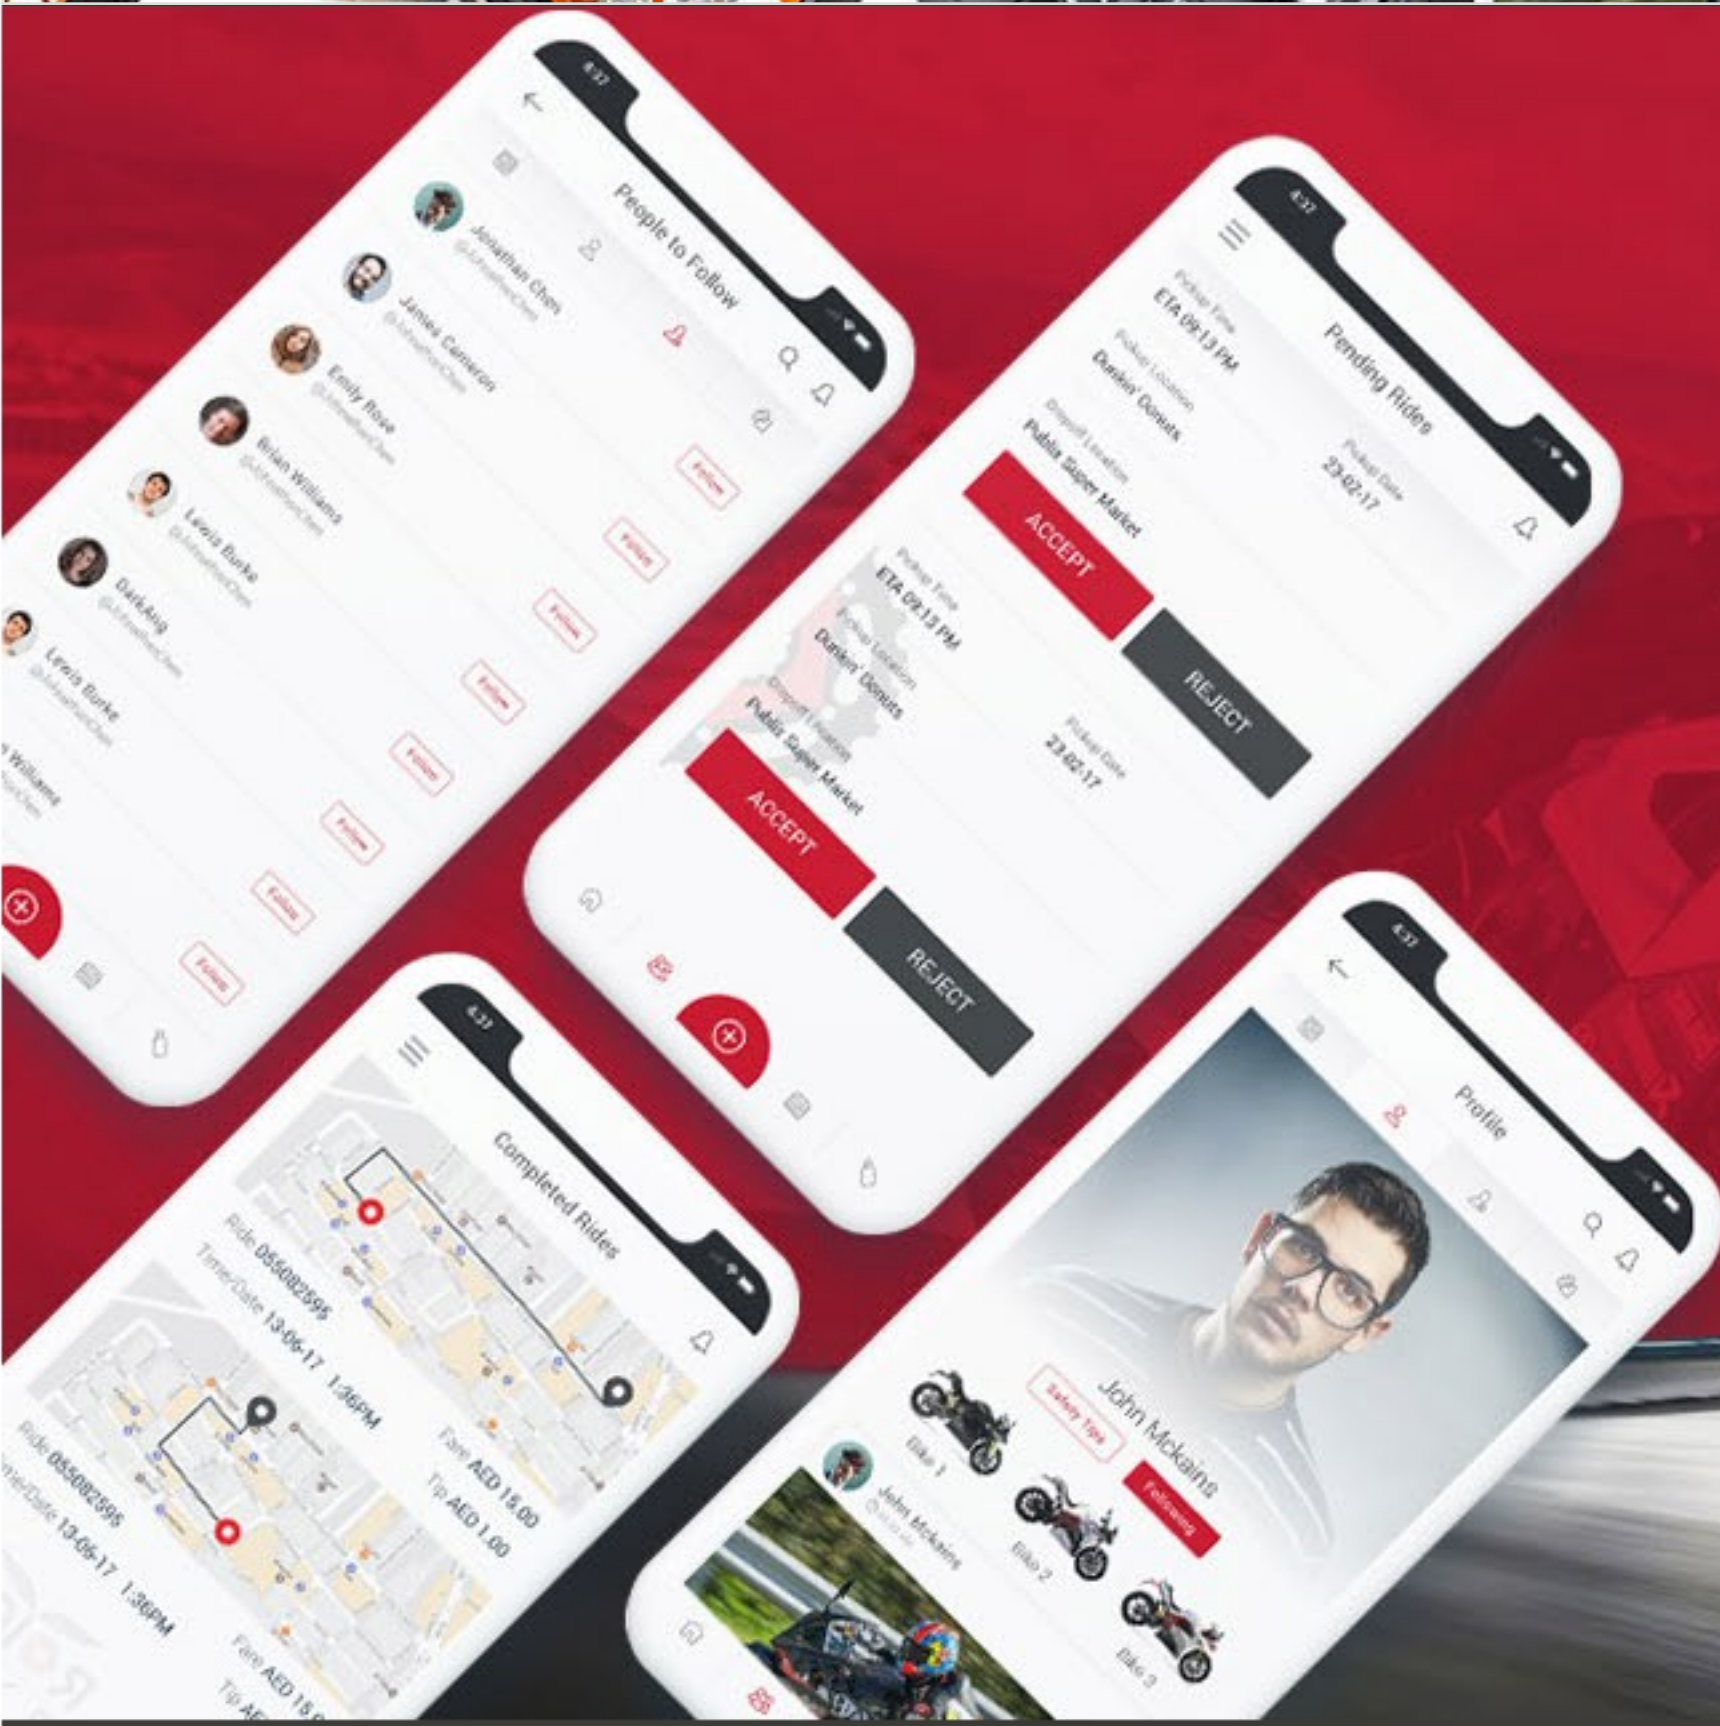

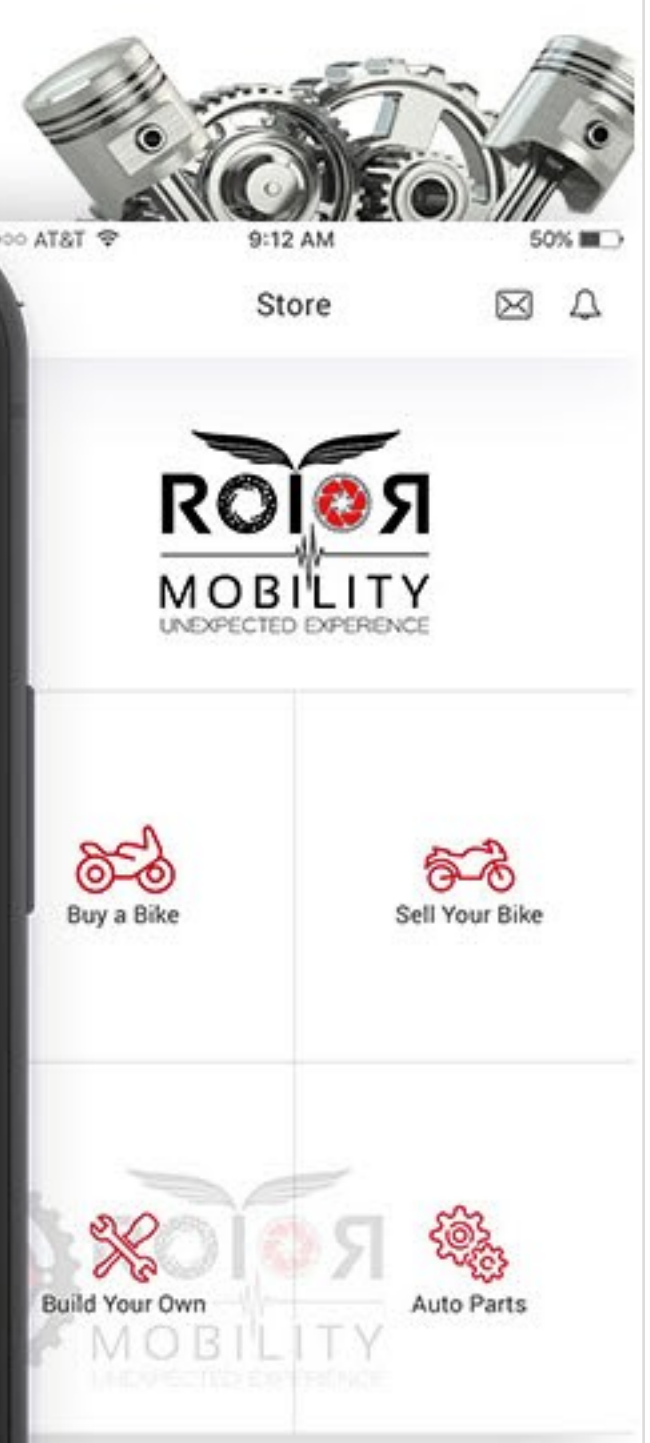

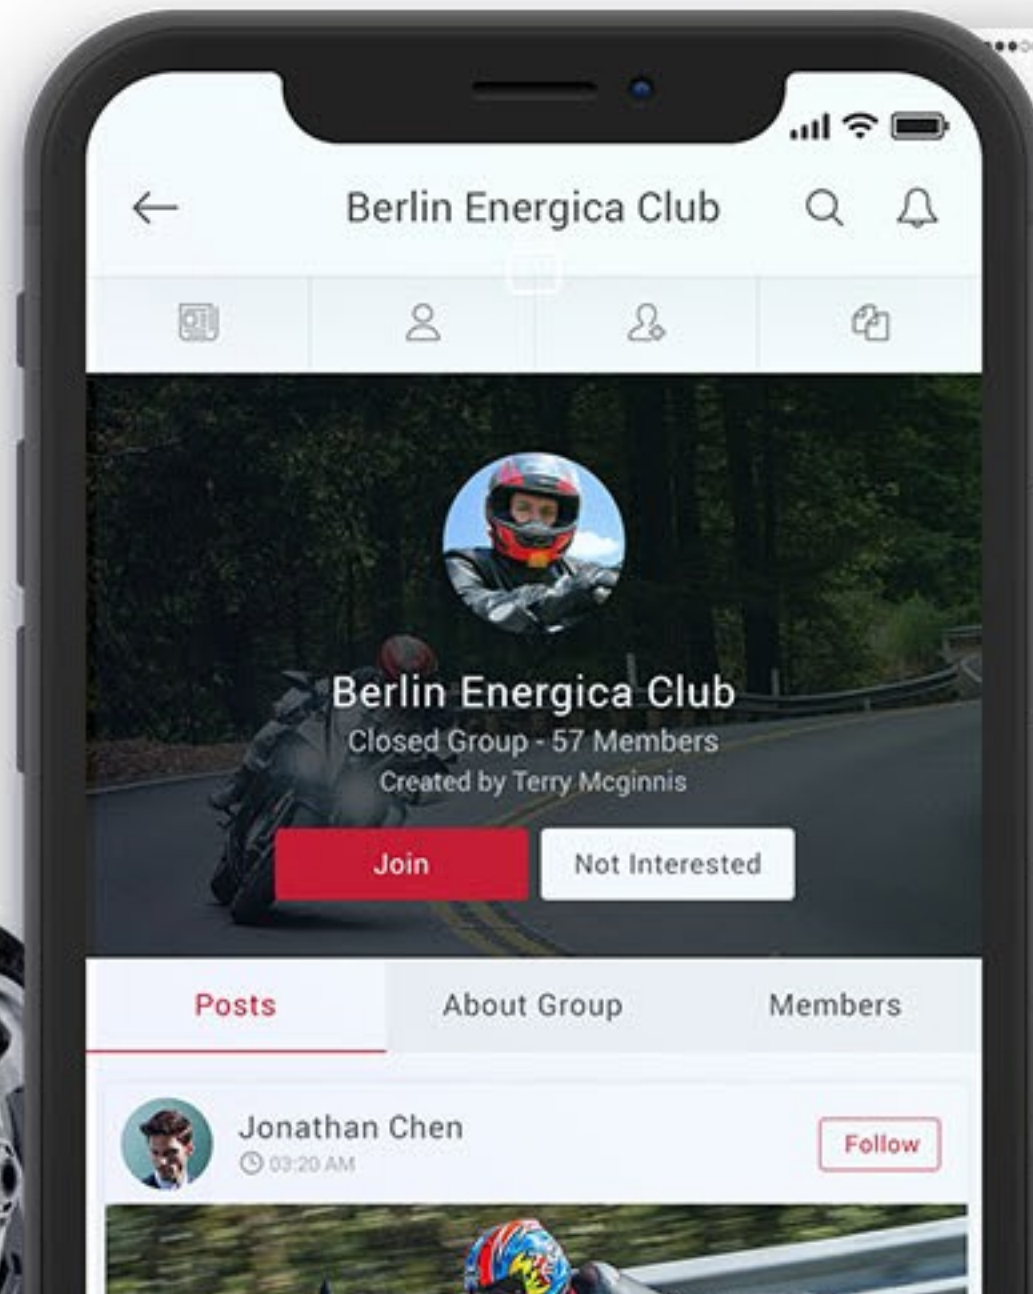

## PROJECT OVERVIEW

Our client believed that buying and selling a motor bike can be hassle in this busy city life. He wanted to make bike trading as easy as 1,2,3. So we came up with an idea of Rotor Mobility App, which enabled buyers to purchase bikes within few clicks.

## SIMPLE NAVIGATION

We designed this application keeping users' ease in mind. We made sure that the audience is can easily surf through the application and navigate their desired product easily.

## EASY-TO-USE LAYOUT

An easy-to-use design layout and simple design screens were used to make it easy for the user to make decision and purchase their desired motor bike without any hassle.

## ATTRACTIVE AND ENGAGING APP SCREENS

We have used attractive and engaging designs showing complete details of vehicles to make it easy for user to choose their desired bike.
