

The client wanted a live streaming app to provide their customers an easy and amenable platform to share their live videos with friends or general public.

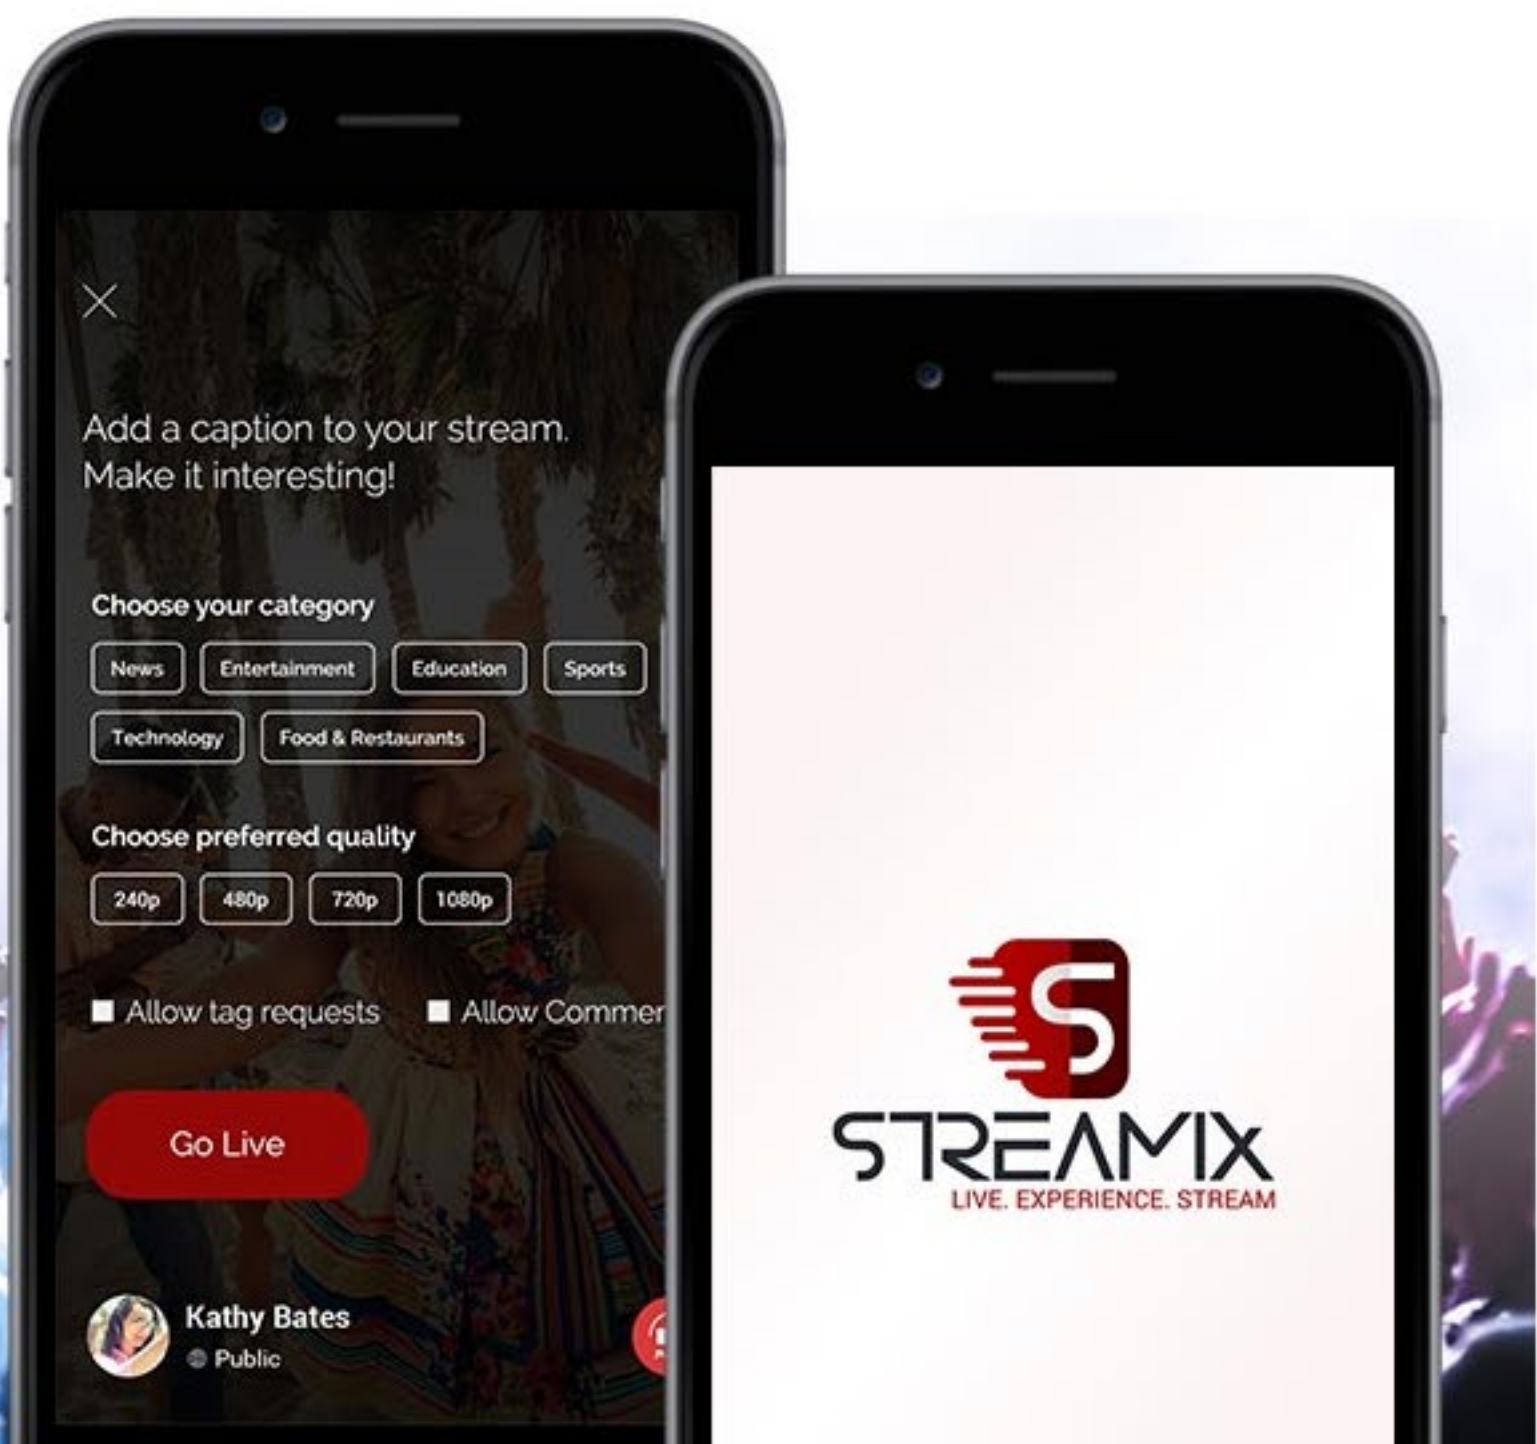

PROJECT OVERVIEW

The client wanted a user-friendly app with cool interface and features to target the audience who like to share their daily life experiences with friends via live videos.

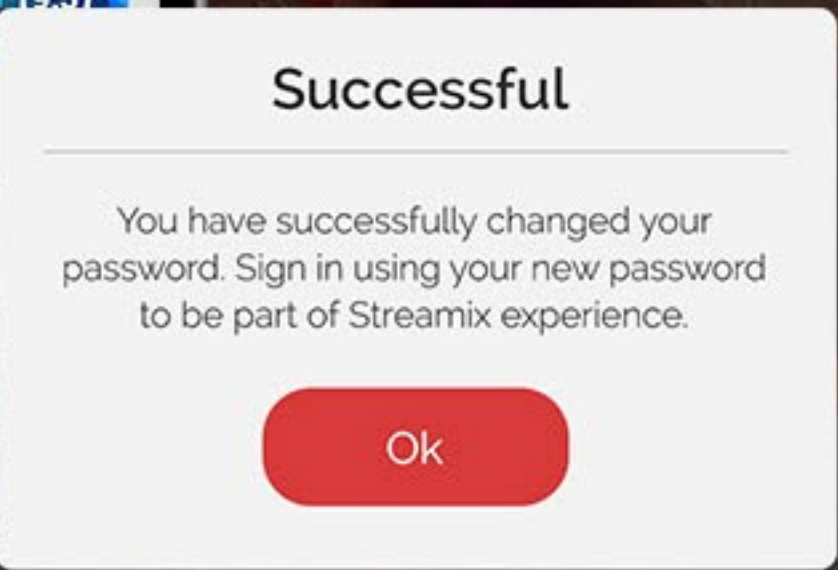

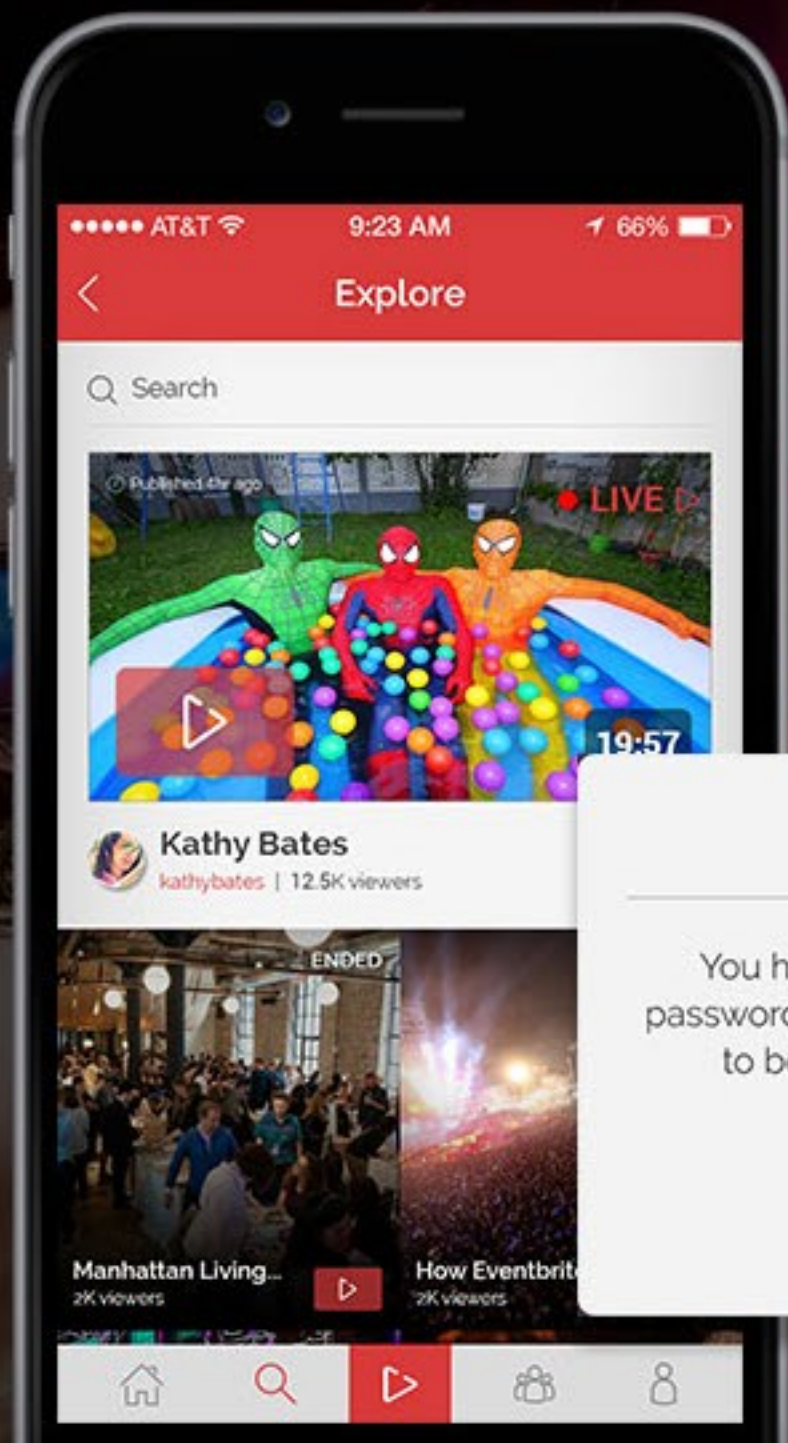

FEATURED SECTION

All the user have to do is to sign up, add friends, and start streaming their live videos and receive likes and live comments on their broadcast. The app also offers a live group video option to make the experience more interesting.

SECURE STREAMING

The app has the option of sharing the live streaming with friends or a user can make a streaming public upon his wish. Secured with encrypted password the app completely protects you entered data and videos.

A SEAMLESS AND FRIENDLY JOURNEY

We have used attractive and engaging designs showing complete details of vehicles to make it easy for user to choose their desired bike.
