

The client wanted an app that could provide a logistics platform for the users to request food supply, special services, daily supplies, mail receipt and many features.

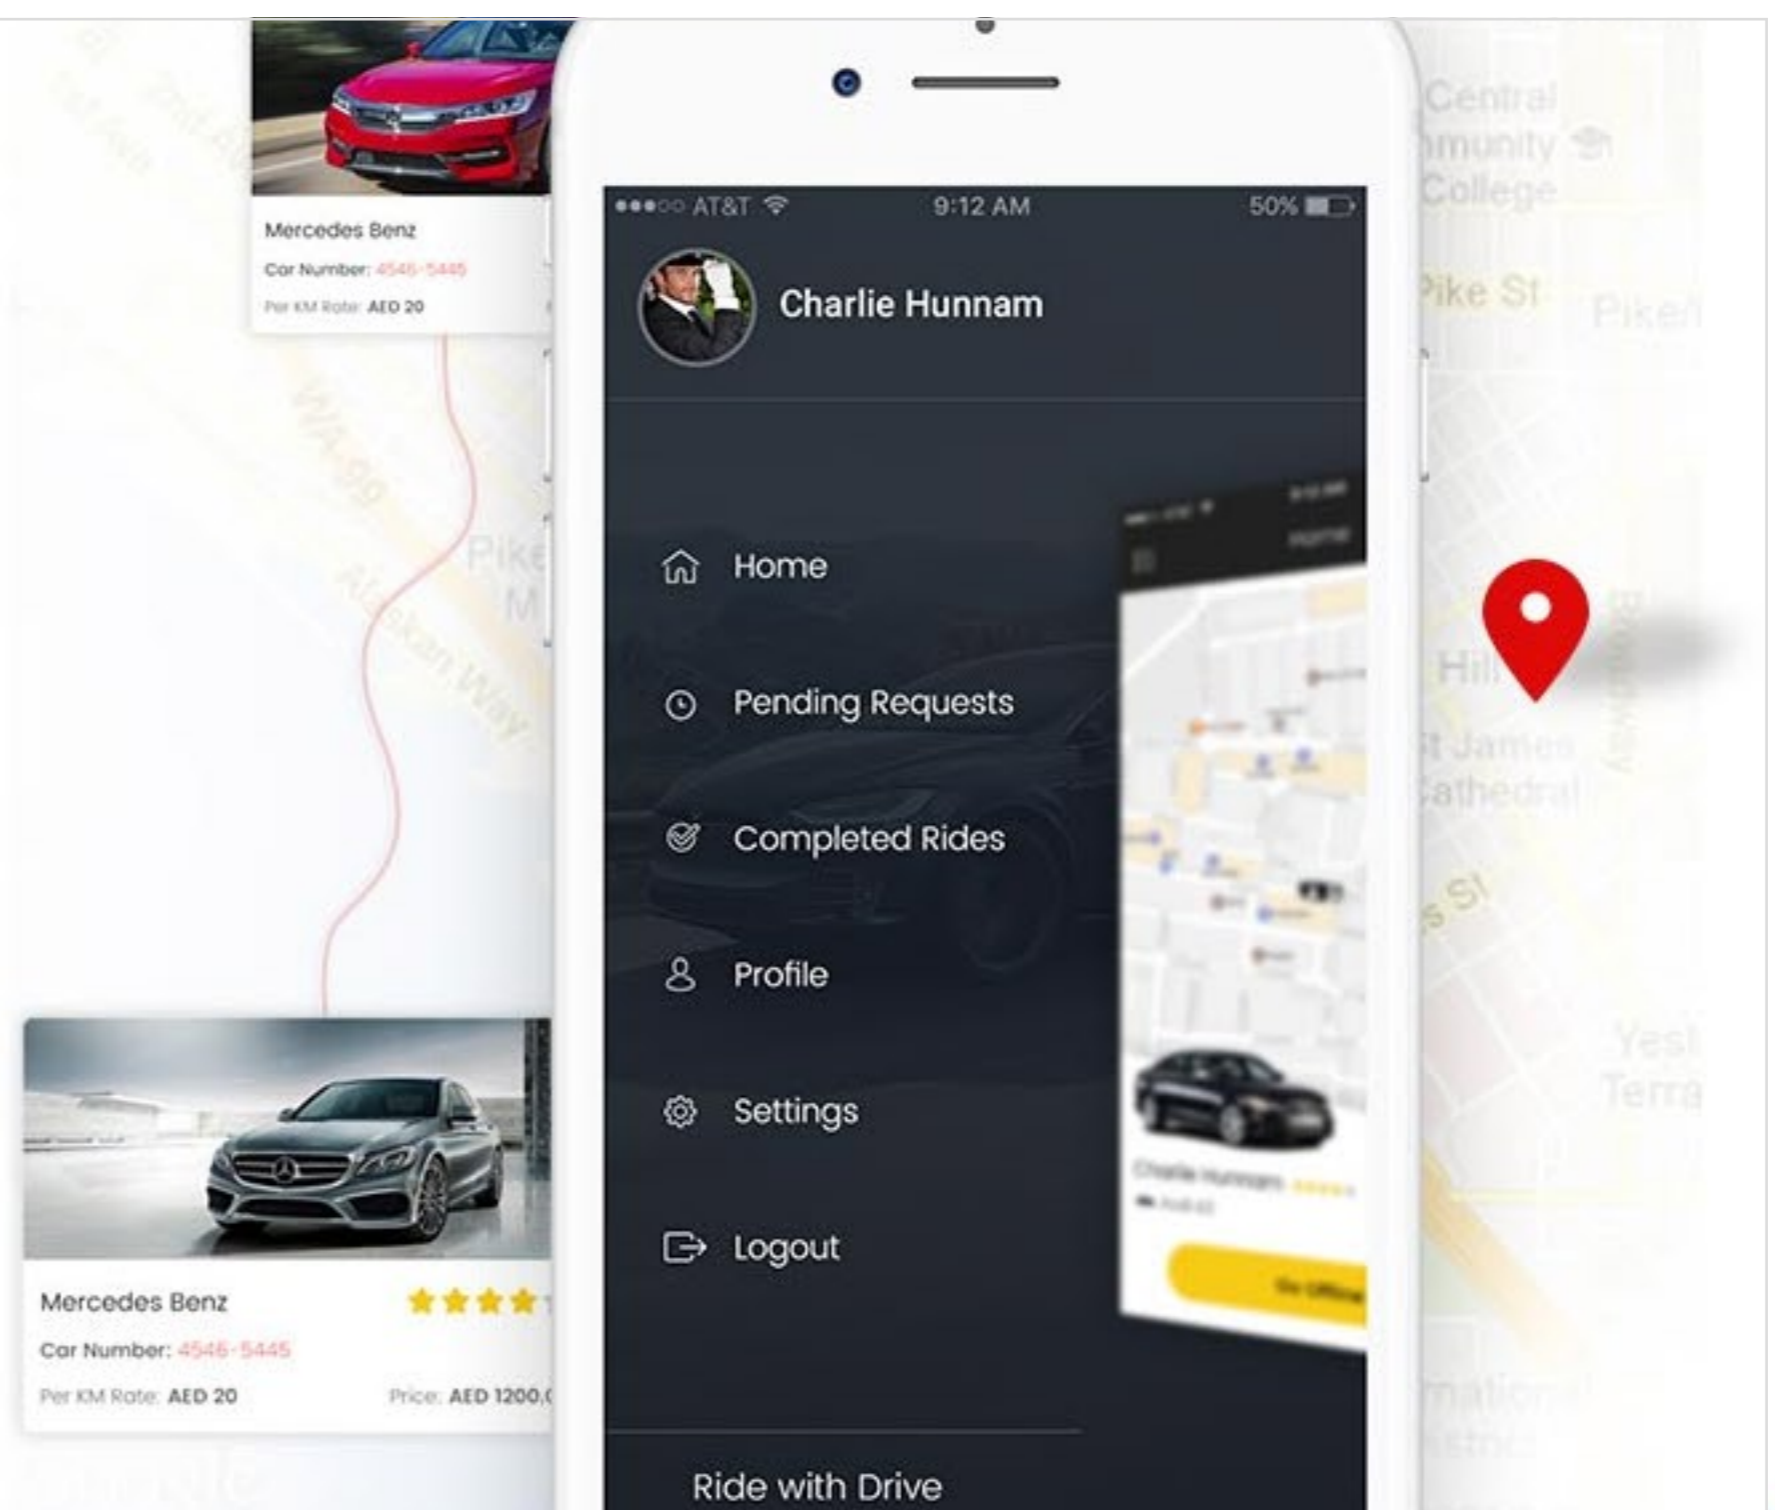

## PROJECT OVERVIEW

The app was a challenge as it catered to various services within one platform but NGIC's competent team acquired the goal with utmost competence and provide the customer exactly that was asked.

## FEATURED SECTION

The app is equally comprehensive for the user and the service providers. It fulfils all the needs of both the parties with utmost gratification. The client approached to get an app that is not only user friendly but is similarly facilitative for the service providers and INGIC delivered the meticulous requirements.

## A ROBUST DESIGN

As the app is a wide ranged platform to accommodate numerous services, the design needed to be one of kind to provide the variation of users, interacting with the app, convenient usage and co-operative interface. The design was a result of well-thought out process which accomplished all the musts with excellence.

## EXCELLENT AND BRILLIANT NAVIGATION

The navigation of the app is smooth and vivid and allows the customer to easily access any section they want with just few clicks.
